MESSAGE FROM THE PRESIDENT

2009 Price List

Message from the President

2009 will witness the launch of an all new product – the Liberty Platinum. Building on the solid reputation of the 20 year old Liberty, Anchor has engineered a new version which is louder, clearer, weighs less, has a longer battery life, and features a built in MP3 player.

We are doing everything we can at Anchor to keep costs and prices down. So, the new Liberty Platinum will not have a price increase above the current model. This exciting new product will debut at InfoComm 2009 and will be shipping this summer.

Anchor's legendary product quality will continue as we manufacture in the US under strict quality and environmental guidelines. Our lean manufacturing techniques mean your order will be filled in 1-3 days.

Thank you for being a part of this great team.

Sincerely,

Janet Jacobs
President

ANCHOR UHF WIRELESS

64 Channels – True Diversity Receiver

64 User-Selectable Channels

- Locate clear channel in your area
- Use multiple wireless units at once

True Diversity

- Selects the best signal from the two independent receivers, thus reducing dropouts & minimizing multiple distortion

PLL Synthesized

- Provides a strong solid signal by locking onto channels stopping drift

Tone Key Noise Suppression

- Utilizes microphone identification signal to lock out unwanted interference

Rackmountable

- Removable antennas for easy installation
- Rackmount kit included
- Half rack size

Displays

- LED channel display
- RF/AF VU meters w/ peak indicators

Receiver Inputs/Outputs

- Balanced XLR output
- Unbalanced ¼" phone output
- Headphone jack w/ volume control

Microphone Transmitters

- Rechargeable from receiver (batteries and cable included)
- Body Pack Transmitter with Mic/Line level switch to transmit signal from CD, tape player, PC, audio mixer, etc.
- Low battery indicator

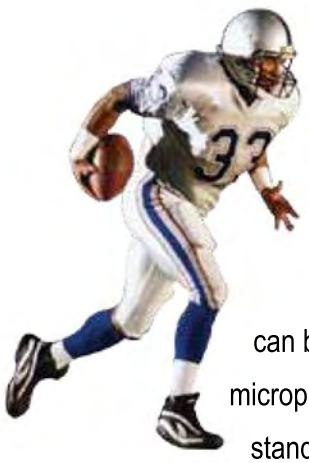
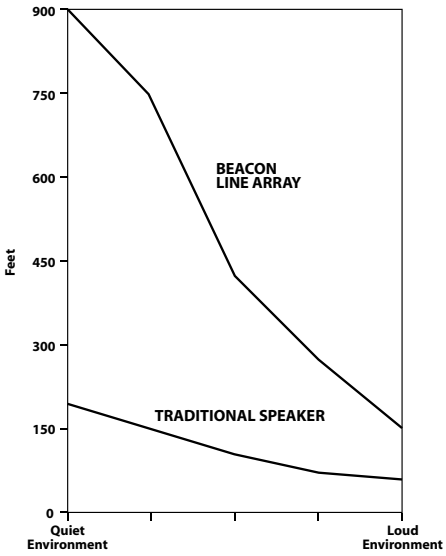
Beacon Line Array Sound System

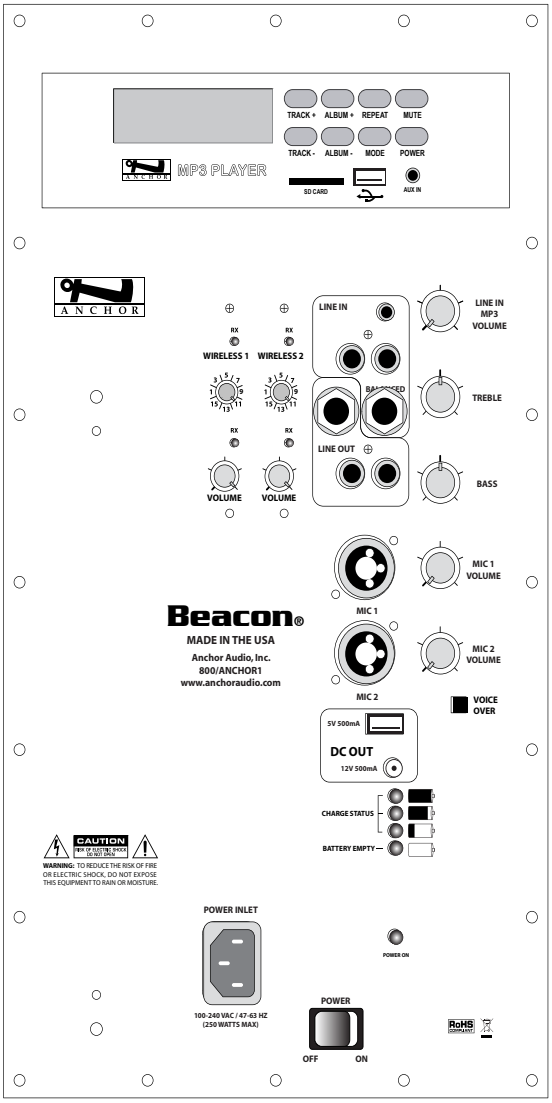


Standing in this corner at 6'0" wearing the nylon bags, with a clean, even reach of 300' the BeaconTM **portable line array** sound system is **ready to rumble**. It requires no training or tools. **Pull it. Flip it. Lock it.** The patent pending line array tower can be opened in less than a minute. Wireless microphones? MP3 player? It's got all that. Speaker stand? Doesn't need it. Everything is built into one **compact enclosure** including battery, storage bag, **collapsible handle** and **rolling wheels**. The Beacon knocks out the competition.



Beacon Line Array will cover the distance 2 to 4 times of a traditional speaker with the same level of power

Product HWD: 30" x 15.75" x 21.5"
Box: 30.25" x 15.25" x 22"
Ship Weight: 51 lbs.
Add 2 lbs. for optional configurations



- **Lightweight speaker array – eight 4.5" speakers**
- **Durable case with wheels and retractable handle**
- **Three 8" woofers**
- **150W AC / 125W DC**
- **Proprietary Class D amplifier**
- **True AC/DC, 110/220 power supply**
- **Two universal mic input jacks**
- **Optional Built-in MP3 Player**
- **Up to two built-in UHF wireless receivers**
- **Receiver has 16 user-selectable channels**
- **Nylon mesh storage bag**
- **"Voice over" music feature**
- **112 dB @ 1 meter**

Anchor Audio introduced the world to portable sound systems, and Liberty became the single word that defines an industry. As we celebrate the **20th anniversity** of the Liberty sound system, Anchor Audio introduces the Liberty Platinum. The **White House**, thousands of schools, the **Special Olympics** and aircraft carriers have the Liberty in common. And with the all in one **rolling soft tote** you can take your **Liberty Platinum** anywhere with ease.

The AN-Mini speaker monitor is the most powerful, smallest system in the market. The AN-Mini is battery-operated so you can take it anywhere. Just switch it on and you are ready for any indoor or outdoor assemblies. You can also connect your ipod, MP3 player, or CD Player to the AN-Mini.

- Reach Crowds of 50
- Delivers up to 109 dB of clear sound
- Lightweight – Only 2.5 lbs.
- Operates on Batteries for up to 12 hrs.
- Line Input allows you to plug-in an iPod, MP3, and CD Player
- 4.5” Neodymium Woofer and 30W Amplifier
- Phantom-powered input for electret-type microphone
- Optional Built-in UHF Wireless Receiver with 16 Channel UHF Diversity Wireless by Anchor Audio
- Optional Rechargeable Kit
- Available in Black, Clear, Blue and Red

AN-30

The AN-30CP Contractor Package was designed to respond to dealers who install projectors, sound systems, screens or flat panels in classrooms, conference rooms and meeting rooms. It is the logical evolution of the AN-Mini to meet the requirements of install projects that require a powered speaker mounted on a wall or ceiling. It is available in black, clear, blue, yellow or red.

AN-30CP Contractor Package includes:

AN-30 and SB-30 Wall Mount Bracket

LIST
€150

WingMAN Interface Station

You can become part of the network with the WingMAN. You can interface AnchorMAN wireless with the wired systems including PortaCom and other 2-wire party line systems.

- Duplex Communication
- Four Wireless Groups
- Two Wired Channels
- Antenna Status Indicator
- Easy Operation
- Rack Mount Kit Available

AnchorMAN is a **wireless duplex intercom system** that is easy to configure and **easy to operate**. The system allows duplex communication by four users and an unlimited number of people can listen in. Belt packs can be assigned to up to four separate groups. The transmitter and receiver operate utilizing FDMA techniques in the 944 - 952 MHz range for the U.S. **without the need for a base station**. This **patent pending** wireless intercom has a range up to 250' in duplex mode and up to 2500' in simplex mode.

The **ergonomically designed belt pack** BP-900 has an XLR headset jack, heavy duty antenna, headset volume control, microphone sensitivity control, group selection, PTT (push to talk) and transmission indicator light. A gang charger is available to **charge up to four belt packs** on one device. Anchor provides the ease and confidence of use by suggesting a four person package at excellent pricing. Get your AnchorMAN today.

BP-900 BELT PACK

- **Ease of use – adjust belt pack settings and begin use**
- **Optional single or dual headsets - with dynamic microphone**
- **Four user selectable groups**
- **Efficient 1/2 wave dipole antenna**
- **PTT or Voice activated transmission**
- **Gang charger for four belt packs**
- **Rechargeable batteries included**
- **Safe – AnchorMAN is not penetrated by common scanner devices**
- **FCC License required - www.fcc.gov**

ALD-40 Deluxe Package

This multipurpose assistive listening system is designed to help hard of hearing people better understand speech, music and other sounds during a performance, lecture, movie, meeting or worship service. It's ideal for house of worship, theater, cinema, auditorium, classroom or boardroom. You can add a wireless receiver/transmitter for a complete wireless solution. Both types of transmitters come with rack mount kit.

The tour guide system provides one-way communication that helps cut through the background noise. The tour guide or interpreter wears a body pack transmitter with head band microphone. Listeners use portable belt pack receivers and lightweight headphones to hear every word clearly and easily.

Both systems are available in packages and are ADA Compliant.

AL-HP Headphone

AL-WB Bodypack

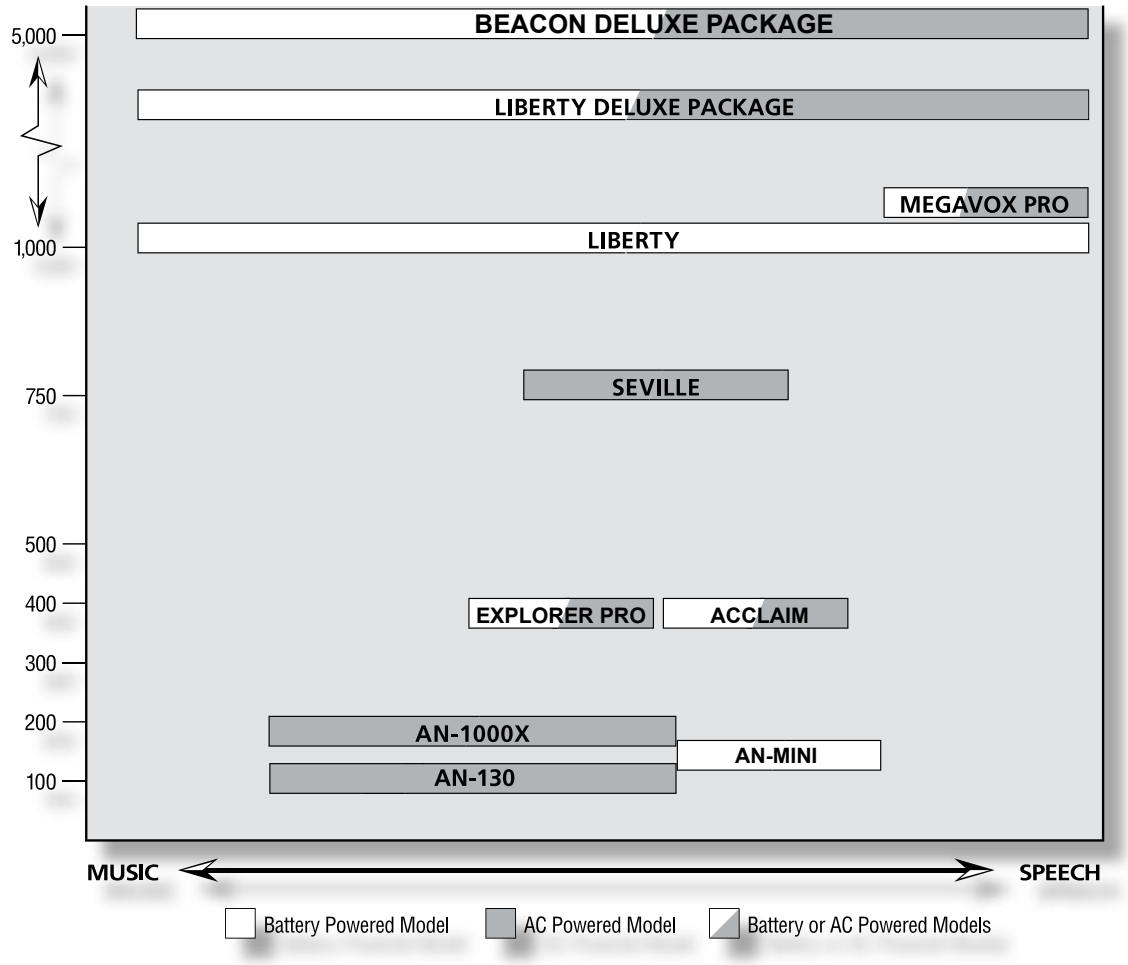
The Anchor Audio product line is designed to suit a variety of end-user requirements. While anyone who must project their voice as a part of their profession is a potential Anchor Audio customer, the teacher's sound system requirements in a classroom differs significantly from the requirements of a drill sergeant on a military base. To determine the best Anchor Audio product for a particular customer, we recommend the following conversation:

1. General description of the customer's application,
2. Need for speech AND music or speech only?
3. Plan to use the system indoors AND outdoors, or outdoors only?
4. A/C power available?
5. Maximum number of people in audience?



NOTE: Estimating crowd size is tricky business due to ambient noise conditions, construction materials in the room, shape of terrain in an outdoor environment, microphone handling techniques of the individual who is speaking, etc. Anchor Audio engineers have made their estimates based on the following factors:

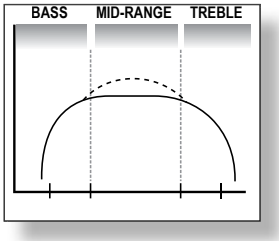
- SPL rating of each sound system, without a companion speaker (except deluxe packages),
- Typical distance covered by a given level of SPL,
- Angle of the sound field for each product,
- Number of people who can fit into that sound field at 12 sq. ft. per person.

INTELLIGIBILITY

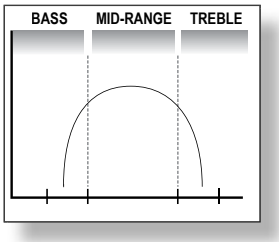
Anchor Audio focuses its design efforts on voice intelligibility. Two factors contribute to intelligibility:

PROPER FREQUENCY RESPONSE and LOW DISTORTION allow Anchor Audio Sound Systems to deliver excellent voice intelligibility.

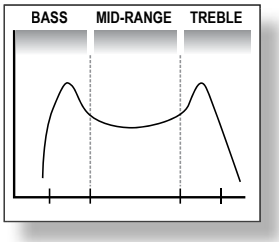
1. **Frequency Response** – Anchor Audio sound systems are designed to emphasize the mid-range frequencies to enhance vocal intelligibility. Music-oriented systems artificially boost the bass and treble amplification in order to deliver "boom and sizzle"; however, this design causes the voice reproduction to be muddy and hard to understand. Anchor systems accentuate the mid-range where vocal intelligibility exists. We then use bass and treble frequencies to give the voice a natural warmth.



Anchor's "Music & Voice" sound systems deliver a smooth frequency response through the mid-range for clear, natural voice amplification. On the Explorer Pro models, the "Speech Projection" switch boosts the mid-range for even greater speech projection (that's the dotted line).



Anchor's "Public Address" systems including the MegaVox, MiniVox Lite and Little Big Horn deliver their power in the mid-range to maximize clear vocal intelligibility. For crowd control, coaching instructions or demonstrating the use of heavy equipment outdoors, this is the type of sound system to choose.



Competitive sound systems that are designed primarily for music boost the bass and treble in order to deliver that "boom & sizzle" which we all love. Unfortunately, that design overwhelms the mid-range frequencies and results in muddy, hard to understand speech projection.

2. **Distortion** - Anchor Audio sound systems are designed for low distortion (accurate sound reproduction). The factors that contribute to this accuracy include:

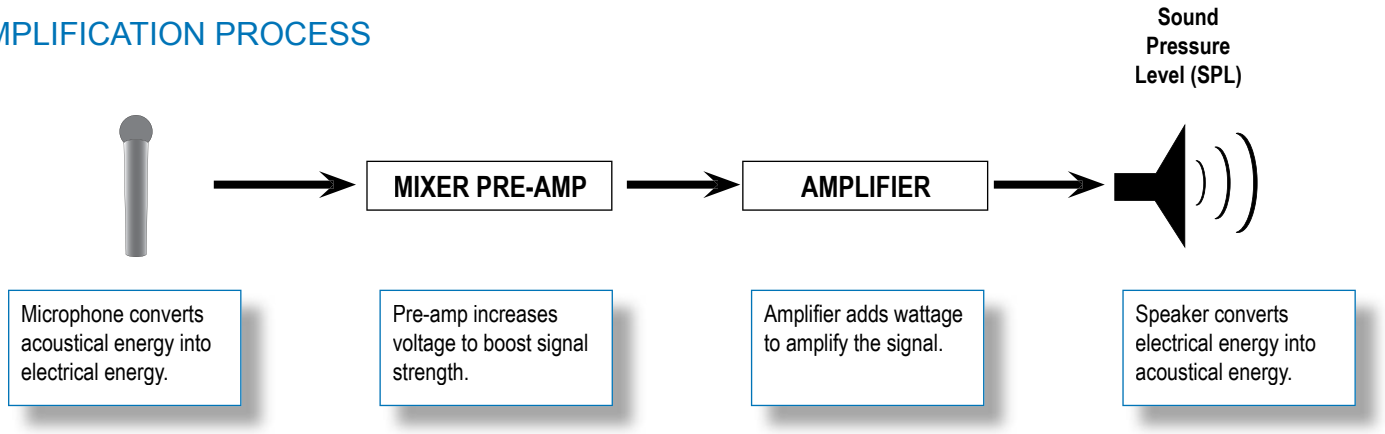
   - **Accurate / Low Noise Electronics** – Anchor's amplifier designs can deliver unusually high peak power levels and incorporate "active dynamic limiting" which combine to prevent overloading and distortion of the sound. This insures clean, pure sound at even the highest power levels.
   - **Enclosure Resonance** – Anchor's enclosures are designed to resist vibration and internal echoes; therefore, the enclosure itself does not distort the sound.
   - **High Quality Speakers** – Sophisticated speaker design, quality materials, and excellent assembly workmanship all contribute to crisp, pure sound.

The result is accuracy and intelligibility, and no one does it better.

SOUND PRESSURE LEVEL (SPL) is a measure of loudness. Anchor Audio designs its sound systems to deliver the maximum SPL while minimizing weight, size and power consumption on battery-powered systems.

How do you measure how loud something is? Many people think that comparing wattage ratings of various sound systems is a relevant measure, but wattage is only one element in the equation. SPL, which is measured in dB (decibels), results from a combination of (1) microphone sensitivity, (2) mixer pre-amp voltage, (3) main amplifier wattage, and (4) speaker efficiency.

AMPLIFICATION PROCESS



Sound Pressure Level (SPL)
MIXER PRE-AMP
AMPLIFIER
Microphone converts acoustical energy into electrical energy.
Pre-amp increases voltage to boost signal strength.
Amplifier adds wattage to amplify the signal.
Speaker converts electrical energy into acoustical energy.

The goal of an Anchor Audio sound system is to balance each stage of the amplification process in order to maximize SPL without generating distortion by overdriving the system. If you are assembling a component-based system, you will have to balance the power and sensitivities of each part of the system; however, in a packaged system, sensitivities and wattage are handled by the manufacturer and the only relevant measure is the ultimate SPL of the package.

Anchor Audio's products have optimized the balance between SPL, weight of the system, size and battery life in order to suit the needs of our various customers. Anchor's products are rated based on their dB levels and the following chart will provide a general understanding of how loud the different dB ratings are in the real world.

COMMON SOUNDS	SPL		ANCHOR AUDIO	SPL
Threshold of hearing	0 dB			
Rustling leaves	20 dB			
Quiet whisper	30 dB			
Normal conversation	60 dB			
Loud singing (3 feet)	75 dB			
Food blender	90 dB			
			ClassAct	101 dB
			AN-30	101 dB
			AN-130	101 dB
			AN-1000X	103 dB
Power mower	107 dB	VS.	Seville Lectern	107 dB
			AN-MINI	108 dB
			Explorer Pro	110 dB
			Beacon*	110 dB
			Acclaim	114 dB
Chain saw (3 feet)	117 dB		Liberty €inum	110 dB
			Little Big Horn	117 dB
			Liberty and Companion	123 dB
Amplified rock & roll (6 feet)	120 dB			
			MegaVox	126 dB
Jet plane (100 feet)	130 dB			

NOTE: An increase of 6 dB represents a doubling of SPL (loudness)

** The Beacon™ line array provides a 120° sound dispersion pattern that triples the coverage of a traditional speaker at the same SPL.*
